A recent graduate Full-Stack Developer, offering a dynamic blend of Full-Stack technical knowledge and a creative eye nurtured through a background and interest in visual communication. With additional professional experience in Human Resources, I have nurtured my communication and collaboration skills, enhancing my ability to work effectively in team environments.

I enjoy attending local tech events and networking with industry professionals and am extremely eager to pursue a career in developing software that improves daily life with creative interactivity and user created experiences.

Tech Stack

Languages & Environments	Frontend	Backend & Databases	Testing & Tools
Javascript	React.js	Express.js	Jest
Typescript	Next.js	RESTful API	Playwright
Node.Js	Vite	Postman	Cypress
HTML	React.tsx	PostgreSQL	Auth0
Git	CSS	NoSQL	Router
Github	Figma		Deployment
	Bootstrap		

Experience

School of Code / Trainee Full-Stack Developer
MARCH 2023 - AUGUST 2023, REMOTE

16 week intensive bootcamp at School of Code , funded by the DfE. Learning the fundamentals of programming, how to work in a high performance tech team and specialised in full-stack JavaScript development. This consisted of daily workshops, weekly team rotations and end of week Hackathon projects. This also involved two larger projects working in teams of 4 -6 people creating an app to target specific identified problems.

Building full-stack applications in agile teams and utilising trello boards to create productive environments to ensure continuous integration and development of software lifecycles, which was presented to businesses and stakeholders for feedback.

Gained proficiency in skills such as JavaScript, React.js, Next.js, Express.js, CSS, HTML and full-deployment (Vercel, Netlify). And building RESTful API architecture with relational databases (PostgreSQL).

Collaborating and communicating with developers from all backgrounds, different personalities and working styles through pair programming, weekly sprints, hackathons and scrums to create high-performance tech teams.

Developed strong problem solving to understand and respond to client and user needs, with the ability to learn new skills at pace.

Employing best code practices, with a strong focus on Test Driven Development,

documentation, auth for security, code reviews and writing maintainable code to ensure readiness for creation of robust systems.

DoggyStuff - Personal Project (WIP)

https://github.com/n335h/doggystuff

https://doggystuff.netlify.app/

A full stack application for a natural dog food brand. DoggyStuff is a personalized dog food subscription service that tailors the order based on your dogs unique needs. Built in React TSX with supabase handling the back-end and Auth.

TypeScript, React, Router, CSS, Figma, Supabase, Netlify

PaprBack - SoC Final Project

https://github.com/n335h/soc_byteclub_paprback

https://bcpaprback.netlify.app/

As part of a team of 6 junior developers we were given a task - to solve an issue. We decided to create a community platform to connect local people to discover and share second-hand books. In 5 weeks we fully ideated, designed and developed a full stack application.

JavaScript, CSS, Node JS, Express, Jest, Netlify, Render, ElephantSQL

Telent Technology / HR TA Coordinator
FEBRUARY 2021 - FEBRUARY 2023, WARWICK

Pantos Logistics LTD / HR GA Coordinator
JANUARY 2018 - DECEMBER 2021, RYTON-ON-DUNSMORE

Education

University of Derby / Visual Communication
SEPTEMBER 2009 - JUNE 2012, DERBY

Warwickshire College / Graphic Design
SEPTEMBER 2007 - JUNE 2009, LEAMINGTON SPA

Princethorpe College / GCSE
SEPTEMBER 2001 - JUNE 2006, PRINCETHORPE
